Staff MLO FSO

KR : Claire Reppen

This is a general write up regarding specific Out - Ethics I have observed Claire to be involved in.

I have checked up /seen her about 100 times since I took her on in November, 2000. Every time I see her she is doing the following things:

Putting on make-up

Getting ready to dye her hair

Buying a St. Pete Times newspaper

Plucking her eyebrows

Reading the newspaper

Reading a novel

Drinking coffee with a room mate or friend

Smoking

Visiting her daughter

Chatting with friends

Giving me bad or critical remarks about RTC, CMO terminals, Security and other crew.

Causing out PR with non- Scientologists

I have only once seen her resting.

I have never seen her exercising, like she is supposed to.

I also have not seen her twinning on Assists even though I gave her various elderlies who were happy to do this with her.

With my other elderlies I handle them myself if they are slack or out ethics. This is my job and any responsible SO member would do the same. When I have tried to take up these points with Claire her response is to write to very high Org terminals and spread black PR about me and natter about how I am mishandling her.

She seems a bit obsessed with reading the newspaper. When I took this up with her she insisted how the paper is not entheta and is informative. This is a bizarre viewpoint for a Scientologist - let alone a S.O. member. She also reads the obituaries and tells me who died. This is destructive for her first Dynamic and will not contribute to her getting well. Hacienda Security says that she goes out every day like clockwork just to get a paper. One day she did not get one as we had to go
