RE: BFG

Dear Sir,

There have been some further postings from BFG in the last 24 hours – attached to the bottom of this comm. Due to the nature of the data, I wanted to send this to you first before doing any direct string pulling with Gold Security. The analysis we have done on BFG, based on the data we have, is directly below, still points to Marc Headley, probably in collusion with Stefan.

It is clear that we urgently need a line into Marc Headley to fully determine if this is him or not. This is being debugged so we can get some intel.

We want to have Kirsten meet with Erick G. and Matt XXXX and confront them on what they are not telling her as these two are connected into Marc and Stefan and must know more. The indicators we have are: we know Stefan was at the Burbank get together 3 weeks ago and Erick was there but didn't tell Kirsten about this; we know from Claire that Erick hooked Stefan up with Marc for work. We learned from special collection that Stefan and XXXXXX recently purchased something from a new company Matt Price is trying to start up (Digital Hoo Haa) and he didn't tell Kirsten this. Kirsten would confront them on the data on BFG and get them to tell her everything that they know or have heard that could possibly relate to this, making it clear that what BFG is doing is completely suppressive and whoever this is will be found out anyway eventually, not to mention whoever this is, they are violating the hell out of any documents they have ever signed.

Recap of our earlier BFG ANALYSIS:

The poster gives no data about specifically where they worked. Says they are providing data about the base mostly from the years 2004 and 2005, but also gives some data going back to the late 1990s and early 2000.

Aside from the dates provided, there are a few clues that date the person such as a mention of the Ron Snr. ticket cycle on the highway (mid December 2004) and a mention of TDV as though he is still there (TDV left in April 2005). Per Gold Security records, the people who left the Sea Org around this time (between December 2004 and April 2005) were Marc, Claire Headley, Gary XXXXX, Carrie XXXX and Jimmy.

We do not believe this is Gary XXXXX as we have some data about his having not been willing to connect up with Chuck Beatty a few months ago, when Chuck tried to get him in comm; and he also would not have known half this data.

We have come up with Marc Headley as a likely suspect for the following reasons:

He could have known many of the datums noted in these postings that relate to the base. One specific in the postings was that BFG said he knew Pat G. in 1984 which would have been when Marc was only 11 years old; his sister was spoken with and said that they did know Pat in 1984 as they lived right across from CC Int and used to see him then. (Pat was at CC Int in 1984.)

Search of Int Data Files found Marc using the word "friggin" in one report and this is a specific term, spelled the same way, used by BFG. Marc also used the word "badass" which is another term BFG uses. (Note: Jimmy XXXX was also looked into as a possible suspect. He too uses these two terms however, didn't know Pat G. in 1984 and BFG said he did.)

Marc would have attended meetings.

He has done nothing on his steps and has come up with several recent BIs – contacting Marcy XXXXX on February 14th to tell her that her son, Trevor, was not doing well a year ago and she should let him know he (Marc) would give him a place to stay if he ever left; contacting Claire's mother on Feb 18th and trying to get her to come see the baby at the hospital; and Claire's not calling Kirsten back (Kirsten did finally reach her but only after quite some TR3).

The other clue is that BFG ceased posting on 17 Feb and MH would have been tied up with a new baby from the 18th forward.

LATEST BFG POSTINGS ON CLAMBAKE:

Subject description: Where is he/she/they?

BFG is a composite personality that represents itself as people in/out and otherwise connected to everything that goes on at the Int Base. There is so much to tell - where to start - where to end. The final chapters are soon to come and the posts that come then will be crazy and stir up so much. In time, in time.

Gold Security is working overtime to sort this out and not even close to plugging up the leaks. The higher ups are attempting to sort out the problems, but have no idea where to start. There are too many people that are suspect and shutting the whole place down has been an idea for soo long that it might just become a reality within a few short months.

Keep your eyes on the media both print and multimedia. There will even be a dig on Scn at the Oscars tonight! It is coming out everywhere.

In terms of the XSO site - I would post more there but prefer the format and interface on here much better. That's just me.

Stay tuned!

BFG

Dear BFG,
I mailed some quotes from your posts to a couple of names at Gold base, using the main highway address... on postcards...

Regards
arnie

PostPosted: Mon Mar 06, 2006 5:58 am Post subject: Gold Base post cards

That's great. Yeah, I already have intel the that local guys are watching the site and have been reading the posts. No real plan on what they are going to do - more oppression of the general staff and more restrictions to no result.

PostPosted: Mon Mar 06, 2006 4:05 am Post subject: Arnie - You have no idea what went down after this!
Subject description: Photoshop gone wrong

After this photoshop thing was exposed - Karen Hollender went to the Int RPF! She was LRH PPRO INT. Jeff Baker, who did the actual photoshop work was demoted to CPO from an Officer. He was rushed and Karen had him do it on the fly. The flames were shooting all over the Int Base. DM made a bunch of people feel the pain on this one.

PostPosted: Mon Mar 06, 2006 5:54 am Post subject:

No - it was a problem that there was not enough people there as it was "packed house". Karen had the photos retouched before being sent out and the rest is history. just about every photo out of that place has been retouched - nobody had really checked them out that fully.

PostPosted: Sun Mar 05, 2006 9:22 am Post subject: Crazy stuff to check out
Subject description: If you have lines to Media - Have them check these out!

Int Base juicy facts that can be checked out and VERIFIED. Gibe em' to your media contacts.

1. I see Dead People! People have been dying at the Int Base a LOT. Not the accidents. From Cancer and other illnesses. No proper health care and very little to no care about the staff there has resulted in this. At least 10 people have died from this recently. The get moved to a local home in Hemet when it is known they are going to die.

2. Divorce Rates. Scn is always stating about how more Scientologists end up staying married. Total B.S. Check out the divorce rate from the Int Base alone. At least [b]100[/b] divorces from a single Scn facility! 50 in the last 2 years. Divorce factory.

3. Abortions. This one is a whopper. More and more girls are getting abortions there. So much so, they had to start going to different abortion clinics as there were some girls coming back 3 and 4 times and girls coming in on a weekly basis. With the MO office running all of the abortions and setting it up - it was a bit odd. Finally the girls had to deal with it themselves and no one from the Church could go with. I would say that the Int Base has about 50 abortions a year. The ones that keep the babies get shipped off to nowheresville. That has not happened in awhile. 100% have had abortions for the last 10 years at least.

4. Disconnects are Highest Ever! Here is a good one. Set up someone who can collect up all of the info on people who have to disconnect with their families. Get this person to compile this and provide to media. Let's see what Rinder has to say about that! You are gonna have at least 50 people that cannot talk to somebody and those people will be family.

5. The Hemet police are starting to wise up to what is happening at Gold. Hemet itself is starting to talk. Any local attention or any local media contacted would blow the place sky high as they have to do business there. The staff are not able to handle vendors that ask questions.

Anyone that has media contacts - get on this!

PostPosted: Sun Mar 05, 2006 8:38 am Post subject: Security Leaks at OSA and Int Base

Subject description: Who Knew?

Well, isn't that nice. I had to lay low for a bit but with the event now happening - things are shifting.

Bewteen Gold Security and INCOMM, you would think someone there would figure out the leaks at the Base. Dunces. Not having any REAL training in Security or Computers would contribute though. Ever heard of Wi-Fi? Cell phones? Texting? Amazing what things are masked by all of the stupid messages back and forth on the Nextels. Did you know that Nextel network is the single most largest source of Corporate America leaks? Hey - let's give those to all of our slave driven staff.

Anyway, the March 13th event is going to be done in HD! Wait until DM finds but that Gary has no clue as to what he is doing and they end up having to spend huge amounts of money to finish the event to do anything with it. Of course no one is going to show this to DM as it is too late to turn back now. I guess between the Int Guys and the OSA guys - they will all just know that they knew about the flap before it was going to happen but did not know what to do. Ever heard of "sabotage" Gary is a pro at that without any outside help.

My bet is this is the last event that is done in HD. Gary will take a beating and then everyone will go back to doing what they know - which is very little.

Anyway, maybe if security would set up Wi-Fi "jammers" they could at least stop the flow of info off the property. Or maybe if they just drove around with a laptop and found them one by one. Bldg 36 has an intense Wi-Fi network which has holes as big as the Brooklyn Tunnel. Thanks to INCOMM! Can't kill that though or you will shut down all that super dooper production - what a dilemma!

OSA is reading these posts too! Stumped while their own people help feed the posts within here. There are so many people inside that they do not know about it - is crazy. I mean all you need is a laptop or a phone! What - next, no SO members can have laptops? Some guys are above the law and those are the guys that feed the network.

Half the shit that gets out is though your own mail anyway. Hey - ever heard of platens? Secret platens? Who would know? With the amount of attention that the night guard or lazy guard down in 36 pays to looking through the mail - they never find shit. Okay maybe the letter about not buying a MKVII meter? That was just stupid. And Kenny found it between jerking off to porn. That was classic - the one guy who was sort of net savvy - busting thorough the filter to check out porn. That was classic. Anything else slips through like butter.

Also Danny knows about shit that he has not said. Ooops. Deal with it Danny.

Kevin also knows stuff and has said stuff to people who then told people and before you know it, damn! How do you think shit that no one knows slips out. In fact, between him and Kirsten - it is like a data drip from hell. Loose lips sink ships and the Int Base lips are like KY on a 40 year old whore - that is some looseness!

Matt has seen stuff and knows stuff, but pretends not too. Too worried about the wife and him if he were to get into trouble.

When they get questioned - boy are some withholds going to get missed. Which ones - I wonder?

Gold Security as a whole are about the most ineffective group of nobody's that could be assembled.

I mean Murphy is a joke.

Danny - well Danny is Danny - What other guard in all of the world has done the stupid shit that Danny has done? None! But he is still there!

Terrence - Has anyone ever stopped and thought - Isn't it a bit odd that Terrence has not aged a day in the last 10 years? His wife is not that bright - so what does that make him?

This is the best part INT is HUGE. How could you find a computer with a broadband connection if it was not obvious. It is pretty much impossible. No way to track it find it - nothing. It is like a needle in hay stack. No amount of meter checks or interviews will unearth this.

Sorry to all of the Clambakers - I am just going crazy over the stupidity of the Church Security in general. I mean they are into the "person leaving clues" and "wanting to be caught" and yet the leaks just spill through the cracks.

Enough for now. It is time to secure and I have laundry and all sorts of stuff to do.

Stay tuned though - this is going to get exciting!

BFG
